

THE CONNECTED GOODS ELEVATOR IS HERE

KONE TranSys™ DX

A WHOLE NEW WAY TO REPLACE YOUR GOODS ELEVATOR

A replacement goods elevator is a sound investment that will provide years of reliable service. In an increasingly digitalized world, everything is connected, and modern elevators for combined goods and people transportation are no exception. The KONE TranSys™ DX for full replacement redefines the elevator experience with built-in connectivity for improved goods flow and a completely new and inspiring user experience.

DX stands for digital experience, because with the KONE TranSys™ DX you can create an experience that really connects – on every level. It's an easily upgradable solution that evolves with your building, adding value and increasing the attractiveness of the property to prospective tenants.

What's more, because it is powered by the compact KONE EcoDisc®, the KONE TranSys DX not only has exceptional lifting power and performance, it also frees up valuable building space by completely removing the need for a machine room. Contact your local KONE sales representative to find out more.

1

Get connected for smooth logistical flow

A connected goods elevator helps you to optimize both people flow and operational efficiency and ensure your property is ready to take advantage of future smart-building technologies. Built-in connectivity and KONE application programming interfaces (APIs) make it easier than ever to integrate goods elevators into your building's logistics chain, helping you get things from A to B more quickly and smoothly than ever before.

2

Create a durable and functional elevator car interior

Whatever type of building you're developing, we have wall, door, flooring, and accessory options to fit your design, budget, and building-use requirements.

3

Plan for success with KONE as your partner

As your experienced partner for smarter buildings, we can help you manage your property more efficiently with valuable insights into end-user behavior that can be used to continuously optimize people flow and improve the user experience.

Easy to upgrade

With easy digital integration and the possibility to upgrade in the future as your needs change, you're all set to add new connected services whenever you need them.

Easy loading and unloading

Get goods and passengers in and out with ease thanks to wide-opening doors and highly accurate leveling, plus a high sill load according to Class A loading requirements; other loading classes are available on request. With connectivity built in, staff moving heavy loads can optimize their route by calling an elevator remotely.

Compliance you can rely on

Enhance your elevator with solutions that ensure compliance with various codes and regulations, including accessibility, vandal-resistance, and operation during a fire.

Space efficiency

The compact design of the KONE EcoDisc hoisting machine and multi panel door solution mean there is more space available in the shaft for a bigger elevator car.

FUTURE-PROOF YOUR BUILDING WITH BUILT-IN CONNECTIVITY

The KONE TranSys™ DX takes our market-leading eco-efficient elevators and adds connectivity to make them smarter – optimizing goods and people flow, and increasing operational efficiency.

Connected people flow means your elevator solution is easy to upgrade – evolving with your building, adding value, and increasing the attractiveness of the property to prospective tenants.

For your peace of mind, cybersecurity and privacy are at the core of all our digital services and connections. By monitoring our digital environments around the clock we can take better care of them for you – now and in the future.

SMOOTHER LOGISTICS INTEGRATION WITH BUILT-IN CONNECTIVITY

Smart solutions based on connected digital technologies improve equipment performance, availability, and efficiency.

With KONE TranSys™ DX you can take advantage of a whole new suite of solutions and services to minimize interruptions in service. These include digitally enabled solutions like KONE 24/7 Connected Services for the best possible elevator availability.

With KONE APIs you also have the freedom to develop your own smart building solutions, allowing you to better integrate the elevator into your logistics chain to meet the needs of your building and maximize efficiency.

You can also benefit from solutions and services developed by the growing number of partners of the KONE Partner Ecosystem. These can include, for example, automated transportation robots that move goods around the building via the elevators.

PLAN FOR SUCCESS WITH KONE AS YOUR PARTNER

Continuously optimize the logistics flow and improve the user experience in your building with the assistance of an experienced partner. We can help you make your building smarter and more efficient with valuable insights based on a holistic view of end-user behavior and people and goods flow.

We work with an ecosystem of partners to provide new services and solutions, and through our People Flow Planning and Consulting service we can ensure that everything and everyone is able to move smoothly and safely around your building. We can also help you make better investment planning decisions based on solid data, and provide sustainable technologies, materials, and services that contribute to credits and certifications for green-building accreditation schemes.

UPGRADE WITHOUT THE HASSLE

On time and on budget, with no surprises and no unexpected costs – that's our promise. We take care of everything, from planning the project to installing your new elevator. We'll also provide technical and safety information and training when we hand it over to you, as well as provide support with any third-party inspections required. We can also make sure your elevator operates reliably and safely for its entire lifespan with a customized KONE Care™ preventive maintenance package.

FOUR EASY STEPS TO AN UPGRADED ELEVATOR

1 Fact-finding

- We'll carry out a detailed site survey to learn more about what kinds of upgrades would be best for your elevator and building.
- As part of this process we'll talk to key stakeholders to find out what they want to get out of the project.

2 Recommendation and estimate

- You'll get a clear recommendation about what to upgrade based on your needs and our expert opinion.
- We'll provide a detailed schedule and cost breakdown so you know what to budget and how long the project will take.

3 Execution

- Once the project is under way a KONE project manager will be responsible for quality checks and supervision throughout the process.
- We'll keep everyone fully informed about the schedule and progress of the work.

4 Ongoing maintenance and care

- We can create a tailored KONE Care™ maintenance plan for your equipment to keep it running safely and smoothly.
- With KONE 24/7 Connected Services we can monitor your equipment around the clock and take proactive action to prevent potential problems from causing a breakdown.

CREATE A DURABLE AND FUNCTIONAL ELEVATOR CAR INTERIOR

Our next-generation planning tools help you save time, make the right decisions first time, and plan your elevator down to the very last detail.
